Quarterly Financial Report for June 30, 2022

The quarterly financial report presented tonight is for the period ending June 30, 2022. The report consists of three statements for each of the six school system budgets (funds) appropriated by the County Commission. Those funds are: General Purpose School, Federal Projects, Child Nutrition, Transportation, Extended Schools and Capital Projects.

The first statement is a balance sheet which is a picture of the financial condition of that particular fund at a point in time. The asset section represents the resources available to the district for payment of its obligations, much like your personal or business checking account along with any amounts due from others. The liabilities section reflects current amounts due to others. The equity section contains amounts held for future obligations to include fund balance and certain required reserves.

The second statement is a cash reconciliation which is basically comparing our cash balance to that of the County Trustee. This is similar to reconciling your check book to your bank statement.

The third statement for each fund is a report of all revenues and expenditures by category. This report reflects the approved budget amount as amended, amounts received or spent year to date (including encumbrance for purchase orders issued but not paid), and the amount under/over collected for revenues or the amount over/under spent for expenditures.
